

Admissions
Open from
IK I to
Grade - VIII

At EDIFY, all learning occurs interactively with the help of a trans-disciplinary approach which engages the students in the process of 'meaning-making', in order to understand the ways of the world. They do this by making connections across the disciplines at a conceptual level. The Assessments are done based on various parameters to ensure that the various skill sets are assessed in an ongoing process and thus ensuring that each learner is assessed for his or her level of learning in an extremely student-centric process.

- | Indoor and Outdoor Sports Facility | Home Parent Teacher Meeting | Parents Partnership Program (PPP)
- | Performing and Visual Arts | Qualified and Experienced Faculty from India and around the World
- | Student Exchange Programmes | Foreign languages | Multimedia Classrooms

3C Curriculum

The exclusive 3C Philosophy creates a holistic place of learning and knowledge for its students. Edify School is a place where 'why' is encouraged and 'what' is nurtured and where self esteem, independence, leadership, innovation, problem solving and taking responsibility are characteristics promoted. All this happens in a participative environment of academic inquiry, where many more vital skills help

your child step out into the global world tomorrow, competently and confidently. The whole curriculum is carefully and systematically constructed to ensure complete harmony between work, rest and play for a well balanced day. The learner acquires and applies skills which are valuable not only for the learning that goes on within the classroom, but also in life outside the school. They do this by making connections across the disciplines at a conceptual level. The Assessments are continuous and comprehensive; character, competence and content based thus ensuring that each learner is assessed on his or her level of learning in an extremely student-centric process.
